

IN THE CLAIMS

1. (Currently Amended) A computerized method, comprising:
constructing one or more websites;
providing archive software on a computer, the archive software comprising[[:]] one or more methods of website data selection; and
archiving ~~selected~~ website data selected from the one or more websites using the one or more methods of website data selection to a storage medium.
2. (Original) The method of claim 1, wherein the computer is a server.
3. (Original) The method of claim 1, wherein the selected website data comprises one or more visual files.
4. (Original) The method of claim 1, wherein the selected website data comprises one or more website characteristics.
5. (Original) The method of claim 1, wherein the selected website data comprises one or more types of business data.
6. (Currently Amended) The method of claim [[1]] 5, wherein at least one of the one or more types of business data is hidden business data.

7. (Currently Amended) The computerized method of claim 3, wherein the one or more visual files are of a type chosen from [[a]] the group consisting of video, photographs, text, and artwork.

8. (Original) The computerized method of claim 4, wherein the one or more website characteristics are chosen from a group consisting of: order history, banners, page templates, editing tools, and site features.

9. (Original) The computerized method of claim 5, wherein the one or more types of business data are chosen from the group consisting of: user account data, order history, credit history, inventory, camera settings, and photographer.

10. (Original) The computerized method of claim 1, wherein a button on a computer is interactive with archiving selected website data.

11. (Original) The computerized method of claim 10, wherein archiving selected website data is accomplished automatically to a set schedule.

12. (Original) The computerized method of claim 1, wherein a dial is interactive with selecting the website data.

13. (Currently Amended) A computerized method, comprising:

~~constructing a website having~~ receiving a user-specified selection from website information, the website information comprising~~[[:]] archive software~~, one or more photographs, one or more website characteristics, and one or more types of business data; and ~~copying a~~ archiving selection of the selected website information to a storage medium.

14. (Original) The computerized method of claim 13, further comprising:
copying a selection of information to a storage medium from more than one website.
15. (Original) The computerized method of claim 13, wherein a dial is interactive with the selection of website information.
- 16-18. Canceled.
19. (Currently Amended) A computerized method, comprising:
placing archive software on a user's computer;
constructing at least one website, comprising~~[[:]]~~ visual files, web page characteristics, and business data; and
archiving ~~selected~~ data selected from ~~one or more of~~ the at least one website to a storage medium.
20. (Original) The computerized method of claim 19, wherein the archiving is interactive with a dial.

21. (Original) The computerized method of claim 19, wherein archiving is automatically initiated to a pre-set schedule.

22. (Currently Amended) A computerized system, comprising:

a server, comprising~~[[:]]~~ a website,~~comprising~~ with one or more web pages controlled by the server, the one or more web pages comprising~~[[:]]~~ web page characteristics, business data, ~~and~~ visual files, and archive software; and

a remote computer having a storage medium, the remote computer is to receive ~~receiving~~ from the server the archive software to archive copies of data selected from the web page characteristics, the business data, and the visual files to the storage medium.

23. (Original) The computerized system of claim 22, wherein the archive software further comprises:

security software to restrict data that can be archived by the remote computer.

24. (Original) The computerized system of claim 22, wherein the website further comprises links to other websites.

25. (Currently Amended) The computerized system of claim ~~[[22]]~~ 24, wherein the archive software ~~allows~~ is further to copy to the storage medium data selected from ~~[[of]]~~ web page characteristics, business data, and visual files ~~from~~ of the linked websites.

26-35. Canceled.

Please add the following new claims:

36. (New) A computer readable medium that provides instructions, which when executed on a processing system cause the processing system to perform a method comprising:

receiving a user-specified selection from website information, the website information comprising one or more photographs, one or more website characteristics, and one or more types of business data; and

archiving selected website information to a storage medium.

37. (New) An apparatus comprising:

means for receiving a user-specified selection from website information, the website information comprising one or more photographs, one or more website characteristics, and one or more types of business data; and

means for archiving selected website information to a storage medium.
